

PARENTAL CONSENT

SCHOOL NAME: _____

MarillacHealth is providing free dental screenings to students. Marillac dental hygienists will be providing an oral screening and fluoride varnish application at the school. These services are preventative and educational. This form releases any liability of MarillacHealth during this activity. **MarillacHealth may call you regarding further urgent dental needs of the student.**

Cavities (also known as caries or tooth decay) are the most common chronic disease of childhood in the United States. Untreated cavities can cause pain and infections that may lead to problems with eating, speaking, playing, and learning. Children who have poor oral health often [miss more school and receive lower grades than children who don't.](https://www.cdc.gov/oralhealth/basics/childrens-oral-health/index.html)

FLUORIDE VARNISH

Fluoride is a naturally occurring mineral that bonds with the crystal structure of a tooth and provides increased protection from tooth decay. Fluoride is highly recommended by the American Dental Association as well as the American Academy of Pediatrics. Fluoride has been shown to be safe in regulated doses for children and adults.
